

# Confidential Waste & Shredding Services

**It's imperative that confidential waste stays just that—confidential.**

Premier Waste Recycling understand the importance of data destruction and provide secure solutions.

Confidential waste needs to be treated with care. The loss of confidential data can destroy a company's reputation or leak valuable company information to your competitors. Choosing a waste management company you can trust isn't an option, but a necessity.

## Paper Shredding Service

Our paper shredding service is secure, safe and reliable. Plus, all the shredded material is recycled — meaning a reduction in your organisation's carbon footprint.

For companies that prefer to do their own shredding, we can supply you with the right containers and make regular collections. For offices that don't have shredding resources, or who produce too much waste paperwork, we can take the shredding in-house. For this, we'll supply you with a secure, locked container or bags marked "Confidential Waste". We'll then work with you to organise a collection schedule for taking the paper to our facility for secure shredding.

As you'd expect from Premier Waste Recycling, our shredding services offer excellent value for money — but businesses can also benefit by saving money on storage. Shredding is a great way to destroy files you no longer need, reducing the cost of storage or freeing up extra office space.

---

## Waste Collection

We offer a range of reliable waste collection services including:

- Collections from factory, retail, school sites and more
- Collections from civic amenity sites for local authorities
- Kerb-side collections for local authorities
- Collections of confidential waste for shredding and recycling
- Collections of hazardous, clinical or offensive waste streams

## Trusted Data Destruction

We carry out data destruction for all kinds of businesses and public sector groups throughout our operating area. We make sure each organisation has exactly the right equipment to effectively manage their confidential waste. This could include everything from desk collection points to large lockable containers and compaction services.

Our complete and reliable service means that client, employee and business data is secure and properly managed at all times and you will receive a certificate of data destruction. This gives our clients total peace of mind. And as with all our services, Premier Waste Recycling ensure all collections are well organised and on time — giving you one less thing to worry about.

Our data destruction services help organisations comply with both internal and external legal requirements.

## Waste Management — our environmental commitment

We divert as much waste from landfill as possible, recycling glass, plastic, metals, textiles, wood, paper and card. Waste that can't be recycled is sent for energy recovery, where it's made into a fuel that can be used in the place of oil or coal. With all kinds of public and commercial groups trying to reduce their carbon footprint, our approach helps organisations meet their targets.

### Management of Waste

Our services offer total management for all kinds of waste streams in all kinds of organisations. So in addition to collections, we offer a range of services and equipment. These include:

- Total On-Site Waste Management
- Provision of bins and containers
- Provision of equipment such as compactors to large sites
- Management of Household Waste Recycling Centres for local authorities
- Waste audits, monitoring and feedback
- Support and information for schools
- Advice and support to help you understand legislation
