

Waste and recycling bins come in all shapes and sizes, for all kinds of waste.

We'll provide the right recycling containers and bins for your business.

Front End Loader — FEL Bins

Our comprehensive range of bins and recycling containers help you manage your waste in a safe and secure way.

We can provide the right containers for your needs, taking into account what you produce and the space you have for the container. Once you have the right containers, we can then organise regular collections to suit.

Recycle with the Right Containers

You can recycle a wide range of materials when you partner with Premier Waste Recycling. The kind of bins you need will depend on the volume and type of waste you produce. We'll work with you to supply and set up a recycling and waste collection station that meets your needs. This could involve on site compaction, site baling or even air lift systems, if you're a high-volume producer.

The front end loader (FEL) is a popular solution for commercial waste management. They feature a lockable lid and are suitable for sites that produce a high volume of waste.

FEL bins do not have wheels and therefore need to be moved using our lifting equipment. The top loading design makes these bins easy to access and use.

Suitability

- Dry, mixed recycling
- Single waste stream recycling
- General waste
- Compactable waste

Options Include

- 10 CU YD; 7.7 cu metre; L 2.02m x W 2.17m x H 2.19m
