

# Roll On/Off Containers —Rolonof System

**Waste and recycling bins come in all shapes and sizes, for all kinds of waste.** We'll provide the right recycling containers and bins for your business.

Our comprehensive range of bins and recycling containers help you manage your waste in a safe and secure way. We can provide the right containers for your needs, taking into account what you produce and the space you have for the container. Once you have the right containers, we can then organise regular collections to suit.

## Flexibility

You can recycle a wide range of materials when you partner with Premier Waste Recycling. The kind of bins you need will depend on the volume and type of waste you produce. We'll work with you to supply and set up a recycling and waste collection station that meets your needs. This could involve on site compaction, site baling or even air lift systems, if you're a high-volume producer.

Roll On/Off containers can be used for disposing of large quantities of bulky waste, such as demolition or large-scale retail waste.

The Rolonof system features containers in a range of sizes. Containers are available in open or closed versions. At Premier Waste Recycling, we can source or custom make any container to suit your needs.
